

Annexure 1: ADEETIE Sectors & Clusters

The table below outlines the sectors and specific geographical clusters currently identified under the ADEETIE scheme. A *cluster* is hereby understood as a regional gathering of companies aligned to a specific sector. Clusters might be organised through industry associations that support the individual companies through different aspects like technology support or capacity development etc.

As part of this tender, the 14 below outlined sectors shall be covered including all of the 60 connected clusters.
