1. Purpose of the contract and intended development results of the overall project

The German Federal Ministry for Economic Cooperation and Development (BMZ) (the ultimate commissioning party) has commissioned GIZ to implement the overall project.

The objective of the overall project is to enable selected Colombian actors to be better able to implement national energy efficiency (EE) and renewable energy (RE) targets in municipalities.

The objective of the tender published is the inclusion of safeguards and gender measures in order to promote gender equality and avoid or mitigate possible unintended negative impacts within its area of responsibility.

In order to perform the services, the Contracted Party shall assign the experts listed in the tender with price schedule. The price schedule indicates the duration of assignment of each expert.

Amendments to the duration of assignment specified in the price schedule, amendments to the personnel requirements and/or changes in the key experts assigned require the prior approval of GIZ, which shall be documented in a supplement to the contract.

Before each assignment of short-term experts, the Contracted Party shall submit to the GIZ commission manager an implementation proposal in text form (indicating the proposed expert, the terms of reference, the duration of the assignment, specification of inputs for the home country/country of assignment) for approval.
